INTRODUCTION

The Worthington family collection is comprised of the personal papers and mementos of a prominent nineteenth century Sherbrooke family. They center primarily around Edward Draggé Worthington and his son Arthur Norreys although his son Edward Bruen and the other children are mentioned briefly.

Edward Draggé Worthington (18~~33~~<sup>20</sup>-1895) was the first surgeon in Canada to perform a capital operation using ether as an anaesthetic. In 1834 he was indentured for seven years to Dr. James Douglas of Quebec but after serving five years he accepted an appointment as a staff-assistant surgeon in the British army. Later, he spent two years in Edinburgh attending lectures and 'walking' the hospital, returning to Canada in 1848. An extensive practice in the Eastern Townships was built up and he gained the reputation of being a leading surgeon in that part of Canada. He was a member of the Canada<sup>an</sup> Medical Association and one of the governors of the College of Physicians and Surgeons of Quebec. Dr. Worthington was also a strong supporter of the volunteer movement and served in the Quebec regiment of Volunteer Light Infantry in 1837-38, in the 53rd Battalion since its formation and in active service in both the Fenian raids.<sup>1</sup>

Colonel Arthur Norreys Worthington was born in Sherbrooke in 1862 and graduated in medicine at McGill College University in 1886. He became a surgeon of the Sherbrooke Protestant

Hospital and the president of the District of St. Francis Medical Association. In his career as a legislator, Norreys became mayor of Sherbrooke, 1901-02 and was elected to the House of Commons in 1906. In addition, he was an officer in the volunteer movement; surgeon major in 1887 and lieutenant colonel in 1901. During the Northwest Rebellion (1885) he served with the field hospital and was present at the action at Batoche and the operations against Big Bear's band. In 1900-2, he served with the Royal Canadian Artillery in South Africa and was present at the operations in Transvaal and the actions at Lydenburg, Belfast, Orange River Colony and Faber Put.<sup>2</sup>

Lieutenant Colonel Edward Bruen Worthington was born in Sherbrooke in 1860. In 1883 he took his degree of LL.B. at Bishops College University and was admitted as a notary public the following year. He was a senior captain in the 53rd battalion of infantry.<sup>3</sup>

This collection was donated to the Osler Library, McGill University by Colonel E. B. Worthington in 1944. At this time W. W. Francis (1929-1959) was the head librarian. He went through the collection identifying documents and pictures. His notes were found to be most helpful and in most cases have been incorporated into the following description of the material. By going through the correspondence between Francis and Worthington, it was discovered that originally there had been three sketchbooks and three scrapbooks in the collection.

<sup>2</sup>Henry James Morgan, Canadian Men and Women of the time. (Toronto: William Briggs, 1912), pp. 1187.

<sup>3</sup>Morgan, Canadian men and women of the time. (Toronto: William Briggs, 1898), pp. 1104-05.

Today only two sketchbooks remain. In dealing with the scrapbooks, W. W. Francis either detached or cut the leaves so that he could separate items dealing with the prominent members of the family. Thus, it is difficult to determine how much of the original material remains. It was possible, through the different sizes of scrapbook pages to identify at least two separate books.

Originally the collection had been given the accession number of 10033. Later this was changed to its present number of 479. In 1944, when the Osler Library first received the Worthington Family collection, it was found to consist of papers, correspondence, clippings, certificates and other items for the period 1840-1907 for three locations: Quebec, 1840; Edinburgh, 1841-43; and Sherbrooke, 1844-1907. The original holdings were later expanded slightly by E. B. Worthington and these few items brought the collection date up into the 1940's. In dealing with this collection I divided the material into four parts; 1st being the sketchbooks and related items; 2nd being the items added later; 3rd being other loose items such as photographs, diplomas and others; 4th being the items attached to the scrapbook pages. These parts were so identified and labelled as they appeared in the collection.

This collection provides one with an insight into the Worthington family life. The highlights of Edward Dragge's life as a medical student, as a father, as a doctor and as a soldier are revealed in these pages. Also through the eyes of Norreys we can envision the life of a soldier in South Africa and the Northwest territories. The newspaper clippings related to the Boer war and the election campaign of 1906 between Laurier and Borden are fascinating as well as being historically significant.

APPENDIX

A few of the items had a great many names listed, i.e., ledger sheets and rather than include them in the actual item, they have been appended at the end. They have been taken from handwritten lists so the spelling was deciphered as accurately as possible. Those names with a reasonable amount of doubt have been marked with (?) and the few totally unreadable names have, for the present time, been omitted.
