Name: Casey A. Wood Collection

Dates: 1912-1939.

Extent: 1 m of textual records.

Biographical Sketch: Dr. Casey Albert Wood, 1856-1942, was an ophthalmologist, an ornithologist and a bibliophile. Born in Wellington, Ontario, Wood obtained his M.D. from the Bishop's College in 1877 and McGill in 1906 after the two medical faculties merged. He served as a clinical clerk under William Osler at the Montreal General Hospital, where they began a lifelong friendship. By 1886, Wood had decided to make Ophthalmology and Otology his specialties, studying in New York and Europe. In 1889, he settled in Chicago where he practiced, taught and published extensively. In 1911, he presented a large collection of rare books on the subject of ocular diseases to McGill's Medical Library. In 1919, he established and endowed the Emma Shearer Wood Library of Ornithology at McGill University. The Blacker-Wood Library of Biology resulted in the fusion of the Ornithology Library with the Library of Zoology founded and endowed by his friends Robert Roe Blacker and his wife Nellie Canfield of Pasadena, California. Wood's research in ophthalmology evolved into an interest in the history of ophthalmology, comparative ophthalmology, the study of the eyesight of birds, and a passion for collecting books on these subjects. In 1917, Wood retired and he and his wife, Emma Shearer, travelled extensively to British Guiana, India, Ceylon and the South Pacific. He also translated many works of historical interest on ophthalmology.

Custodial History: Donated originally by Casey Wood to the Medical Library and later transferred to the Osler Library.

Scope and Content: The collection shows Dr. Casey Wood's interest for ophthalmology, especially in the history of ophthalmology but also for medicine in the countries he visited, including Ceylon. The collection contains rough copies of published articles or planned papers on these subjects. Ayurvedic medicine was one of his major interests. The collection also contains three versions of the "Descriptive catalogue of the Casey A. Wood Collection of Sinhalese Materia Medica for the Museum of McGill University".

Source of supplied title proper: Title based on the documents of the collection.

Language: The documents are mostly in English, but also in Latin, French, German, and Indian dialects.

Finding Aids:

General Note: See also the collection of rare books in the Osler Library. Conservation and description of the collection to be done.
